

Creating a Website

On This Page:

- [Inventory > Websites](#)
- [Add new website](#)
 - [Basic information](#)
- [Save Changes](#)

Create a new website to represent a new site on which you will be display advertising.

You only need to set up a website the one time; once it has been set up in Revive Adserver, you manage the zones and associated campaigns and/or banners within their website account.

Inventory > Websites

To create a new website, go to **Inventory > Websites**:

The screenshot displays the 'Inventory > Websites' interface. At the top, there are navigation tabs: 'Home', 'Statistics', 'Inventory' (which is active), and 'My Account'. On the left side, there is a vertical menu with options: 'Advertisers', 'Campaigns', 'Banners', 'Websites' (highlighted in green), 'Zones', 'Targeting Channels', 'Direct Selection', 'User Access', and 'Video Ads - Player Info'. The main content area is titled 'Websites' and features a house icon. Below the title, there are two buttons: 'Add new website' (with a plus icon) and 'Delete' (with a red X icon). Underneath these buttons is a table with a single visible header row: 'Name' with a dropdown arrow. At the bottom right of the table area, there is a message that reads 'There are currently n'.

Add new website

Click on the *Add new website* link. This will take you to the **Add new website** screen.

Basic information

Website URL *	<input type="text" value="http://"/>
Name *	<input type="text"/>
Contact *	<input type="text"/>
Email *	<input type="text"/>

[Save changes](#)

Basic information

To create the new website, enter the website's *Basic information*. All of the *Basic information* fields are required:

- **Website URL:** The base URL of the website on which banners will be displayed via the website account being created.
- **Name:** The name of the website account. It is recommended that you use a name that uniquely identifies the website, and will allow you to recognise the website quickly and easily. The website URL without the leading http:// or https:// is generally a good choice, but you may wish to use a different name if that is easier.
- **Contact:** The person who is the main contact for the website. The contact will be used in all emails to the website.
- **Email:** The email address for the contact.

Save Changes

Once you have filled out the required fields and set any optional values, click on *Save Changes* to create the new website. You will be returned to the **Inventory > Websites** page, where you will be able to see your newly created website.
