- Mac / Homebrew

Development Environment Notes.

Handy notes relating to setting up a Revive Adserver development environment.

Mac / Homebrew

<https://getgrav.org/blog/mac-os-sierra-apache-multiple-php-versions>

Install PostgreSQL, PHP & Apache

```
brew install postgresql  
brew install php@7.0
```

Apache Configuration

```
/usr/local/etc/httpd/  
sudo apachectl -k restart
```

PHP Configuration

```
/usr/local/etc/php/7.0/php.ini
```

MySQL

- System Preferences > MySQL
