

# Creating an Advertiser

## On This Page:

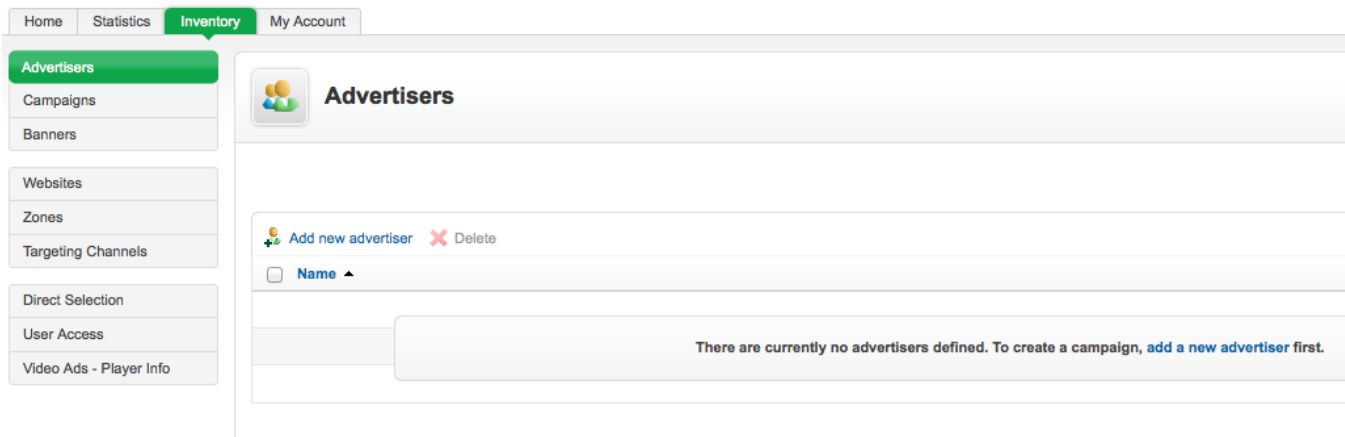

- [Inventory > Advertisers](#)
- [Add new advertiser](#)
  - [Basic information](#)
  - [Advertiser report](#)
  - [Miscellaneous](#)
  - [Save Changes](#)

Create a new advertiser to represent a new person or company who wants to display advertising.

You only need to set up an advertiser to represent a new person or company the one time; once they are set up in Revive Adserver, you manage their campaigns and banners within their advertiser account.

## Inventory > Advertisers

To create a new advertiser, go to **Inventory > Advertisers**:

The screenshot shows the 'Advertisers' management page in Revive Adserver. At the top, there are navigation tabs for 'Home', 'Statistics', 'Inventory' (which is active), and 'My Account'. On the left side, there is a sidebar menu with options: 'Advertisers' (highlighted in green), 'Campaigns', 'Banners', 'Websites', 'Zones', 'Targeting Channels', 'Direct Selection', 'User Access', and 'Video Ads - Player Info'. The main content area is titled 'Advertisers' and features a '+ Add new advertiser' link and a 'Delete' link. Below this, there is a table header with a checkbox and the text 'Name ▲'. The table is currently empty, and a message at the bottom states: 'There are currently no advertisers defined. To create a campaign, [add a new advertiser](#) first.'

## Add new advertiser

Click on the *Add new advertiser* link. This will take you to the **Add new advertiser** screen.

## Basic information

To create the new advertiser, enter the advertiser's *Basic information*. All of the *Basic information* fields are required:

- **Name:** The name of the advertiser account. It is recommended that you use a name that uniquely identifies the advertiser, and will allow you to recognise the advertiser quickly and easily.
- **Contact:** The person who is the main contact for the advertiser. (If the advertiser is a person, rather than a company, the contact may be the same as the name.) The contact will be used in all emails to the advertiser.
- **Email:** The email address for the contact.

## Advertiser report

Optionally, you can select if and when to send email-based reports to the advertiser in the *Advertiser report* section:

- **Email when a campaign is automatically activated/deactivated:** When selected, Revive Adserver will send an email alert to the advertiser when a campaign is activated or deactivated.
- **Email campaign delivery reports:** When selected, a report will be sent to the advertiser at regular intervals, providing details of how their campaigns are performing.
- **Number of days between campaign delivery reports:** How often the campaign delivery reports are sent regularly to the advertiser, when email campaign delivery reports are enabled. Change the value in this field if you want these reports sent more or less often than the default.

## Miscellaneous

Optionally, in the *Miscellaneous* section:

- **Display only one banner from this advertiser on a web page:** When selected, a global limit is put in place that a maximum of one banner will be displayed per web page (where supported by the zone invocation tag type).
- **Comments:** A free-form text area to record notes that may be relevant about the advertiser.

## Save Changes

Once you have filled out the required fields and set any optional values, click on *Save Changes* to create the new advertiser. You will be returned to the **Inventory > Advertisers** page, where you will be able to see your newly created advertiser.
