

TODO

Quick notes about documentation items that need attention in the near future, or are in progress!

- Define what the production system setting in the [Debug Logging Settings](#) does.
- Geotargeting documentation - <http://www.reviveconsultant.com/articles/can-revive-adserver-do-geotargeting/>
- Complete the various [tag options](#) for invocation tags.
- Add a comparison table re: different invocation tag types.
- ~~Variables & targeting.~~
- Direct selection.
- ~~Create documentation about different account types in Revive, and how to manage users and accounts.~~
 - ~~<https://forum.revive-adserver.com/topic/1648-user-management/>~~
 - ~~<https://forum.revive-adserver.com/topic/1261-simple-clients-cant-add-new-banners/>~~
- Document cookies
 - What features depend on cookies?
 - [Cookie-Based Delivery Options Not Working](#)
 - What cookies are set, and what information is in them?
 - <https://forum.revive-adserver.com/topic/4539-detailed-cookie-information/>

- Tips on using PHP opcode caches
- How to set up HTTP/2
- New user tutorial / walk through on how to serve your first banner.
- Video ad documentation.
 - ~~Inline~~
 - Overlay
- (Conversion) Tracker documentation - <http://blackriver.to/2014/01/openx-source-revive-adserver-conversion-tracking-tutorial/>
- Flash banners - how to use clickTag (from FAQ) but updated with examples, inc. for AS3.
- A definition of all of the Revive Adserver URL parameters
 - <https://forum.revive-adserver.com/topic/1548-url-parameters/>
- XML-RPC API documentation.
- Document the database tables (what they are, what they are for, structure, etc.)
 - <https://forum.revive-adserver.com/topic/1274-what-database-tables-are-needed-for-the-new-revive-versions-vs-old-openx/>
