## Development Environment Notes.

Handy notes relating to setting up a Revive Adserver development environment.

---

### Mac / Homebrew

<https://getgrav.org/blog/macos-sierra-apache-multiple-php-versions>

#### Install PostgresSQL, PHP & Apache

```
brew install postgresql  
brew install php@7.0
```

#### Apache Configuration

```
/usr/local/etc/httpd/  
sudo apachectl -k restart
```

#### PHP Configuration

```
/usr/local/etc/php/7.0/php.ini
```

#### MySQL

- System Preferences > MySQL
